

TEXO FOUNDATION | ASC REGION 5

STUDENT COMPETITION

Each year, teams of university students from across 4+ states compete using TEXO member companies' construction projects to show their skill and interest in careers in construction. Students participate in 3 divisions: commercial, design-build, and heavy civil.

This event gives industry professionals valuable face time with some of these universities' brightest and most ambitious students and future recruits.

WHAT'S IN IT FOR YOU

VALUE THROUGH EFFICIENCY

- Entry level registration costs less than most career fairs.
- Gain access to multiple universities at one time.
- DFW location means less travel time and expenses.

BUILD BETTER CONNECTIONS

- Connect with a smaller group of more elite students, many of whom had to compete amongst peers to make the team.
- Build long-term relationships with professors and universities.

RECRUIT MORE STRATEGICALLY

- See students perform in "real world" scenario vs. interview.
- Follow up the high-capacity fall recruiting season with interaction in a more intimate setting in the spring semester.

HOW TO GET INVOLVED

There are 3 ways to support the Student Competition and showcase your company to these high-achieving construction students:

- **Tier 1: Networking Lounge Booth**
A local, targeted recruitment opportunity at a lower registration and travel expenses than most university career fairs.
- **Tier 2: Event Sponsorship**
In addition to a booth in the Networking Lounge, receive enhanced recognition and logo presence across the event.
- **Tier 3: Division Sponsorship**
A 3-year commitment, students will present based upon your company's project, providing an even deeper level of interaction and relationship-building with both students and professors.
